

Finngulf 36, 2003

Finngulf Yachts are built in the highest quality with a combination of traditional craftsmanship and trusted building methods, using only the best materials in an individual small series.

This unit is from the second owner and is hull number 99 and the last Finngulf 36 made. Design by Håkan Södergren. You can find very little wear and tear on the teak deck or hull. The lead keel is safely bolted in the deep bilge.

As the boat has been in a heated hall every winter and the same servicemen have taken care of the maintenance, the boat has always been and will also be in the future a reliable partner for many, many years. Must be seen in order to understand the fine condition!

Location: Pohjankuru, Finland

Price: 82.000€ VAT paid

Measurements:

- Length 11,1m
- Beam 3,28m
- Draught 1,95m
- Displacement: 5.900kg
