Chart plotter, Raymarine

Compass

Log, Raymarine

Mattresses

WC

Shore power

Stereo, Pioneer

Swim ladder

Services done:

Engine and drive unit serviced in the fall of 2023, just before hauling out; engine oil and filter were replaced.

The engine's other filters (fuel, breather, air filter), the water pump impeller, and the compressor oil were replaced during the spring 2024 maintenance.

The drive unit's bellows, gearbox "cone clutch," seals, and other components were replaced during the spring 2023 maintenance. Normally, this service is part of the 1000-hour maintenance.

This spring, 2024, the oil and anodes in the drive unit were replaced.

In 2023, a 100Ah leisure battery was also replaced, and in 2024, the bilge pump was renewed.

The boat has been stored in a warm hall, and regular winter maintenance has been performed.
