

Saare 41 AC, 2014

Saare Yachts are built in the highest quality with a combination of traditional craftsmanship and innovative building methods, using only the best materials in an individual small series. This unit from the first owner is an excellent sample of the great quality and Kamu Stråhlmann's innovative design. For example you can find very little wear and tear on the teak deck or hull. The lead keel is safely bolted in the deep bilge.

The boat has two large cabins, plenty of storage room and even an extra storage for longer passages. As the boat has been in a heated hall every winter and the same servicemen have taken care of the maintenance, the boat has always been and will also be in the future a reliable partner for many, many years.

Location: Uusikaupunki, Finland

Price: 345 000€
