

Sargo 28 Offshore / 2011

The Finnish-built Sargo 28 is a high-quality, functional boat that has everything you need for stylish cruising. This type of boat has been awarded Best in Show at the Vene 12 Båt Design exhibition, where it was described as follows: "Sargo emphasizes usability and functionality – it's made for people who boat a lot." It was particularly praised for its practical details, high-quality finish, and balanced overall design.

This specific unit is well-equipped and in excellent condition from the first owner. The interior is bright and offers two generously sized cabins and wc, while the exterior decks provide plenty of space to move around. The boat has been stored in a heated facility during winters.

The engine has only 728 running hours, and is high-performing while the cabin and cockpit are remarkably quiet while driving. Sargo offers great performance and agility for navigating archipelagos, while also being highly seaworthy and comfortable to drive on open waters. Built to withstand seasonal changes, it's a perfect companion for adventures whenever the waters are open.

Price: 120.000€ VAT paid

Location: Uusikaupunki, Finland

Measurements:

Hull length: 8,80m

Beam: 3,00m
