

## Storebro Storö 34 Baltic Flybridge, 1984

### **A classic and highly regarded Swedish quality boat!**

The Storebro 34 Baltic Flybridge combines timeless design, excellent handling, and superior craftsmanship. The boat features a spacious and bright saloon, a practical galley, and comfortable cabins ideal for longer journeys. This vessel has been carefully maintained and is very well equipped – including a heater, Master-volt electrical system, Raymarine navigation electronics, remote-controlled anchor winch and bow thruster, as well as modern comforts such as an electric toilet and hot water system. The wooden interior is in great condition and has been extensively refurbished. In addition, the boat comes with a meticulously documented service history, reflecting exceptional maintenance and care by its owner. A new teak deck was installed in 2004 and remains in excellent condition. This particular example offers a rare combination within the Storebro 34 range: a large flybridge and powerful yet gently used engines. Economical cruising speed is around 18–22 knots, with a top speed close to 30 knots.

**Ready to cruise – a true classic that combines style, comfort, and practicality!**

### **Measurements:**

Length: 10,35m

Width: 3,2m

Depth: 1,0m

Weight: 7000kg

### **Engines:**
