

REGINA AF VINDÖ 38 DS, 2006

Regina af Vindö 38 DS is a high-quality Swedish yacht built for safe and comfortable cruising anywhere in the world. The standard of craftsmanship and finish is exceptionally high, giving the boat a solid and robust overall feel. Offered by her second owner, this yacht has been maintained with great care: every maintenance and service operation has been fully documented. The boat has always been stored indoors in a heated hall during the winter and is now ready for a new owner, with no deferred maintenance concerns. The yacht is stable and comfortable even in heavy weather and can easily be sailed short-handed by two people. Thanks to the inside steering position, the sailing season can be extended without having to endure poor weather outside. The sails have been serviced regularly and are well suited for long-distance cruising. The boat also offers excellent onboard comfort for extended voyages. The interior features two spacious cabins, a toilet/shower, a very well-equipped galley, and a large, bright saloon. A washing machine ensures clean laundry while underway. The hull is insulated, and in addition to the diesel heater, electric radiators provide extra warmth and comfort.

Price: 229.000€, EU VAT paid

Location: Airisto, Finland

Measurements:

- Hull length: 11,8m
- Beam: 3,8m
- Draught: 1,70m
- Displacement: 9500kg
- Ballast: 3800kg
- Air draft: 16,7m

Engine:

- Yanmar 4JH4-E ym. 2006, approximately 2200 running hours
- Folding propeller
- Serviced every year
