

Jeanneau Merry Fisher 895, 2022

Jeanneau Merry Fisher 895 is a versatile motor cruiser, equally well suited for day trips, weekend cruising, and longer boating holidays. The model has become highly popular—and for good reason. Its modern design combines comfortable onboard living with easy, relaxed handling and excellent seakeeping characteristics.

The two-cabin layout comfortably accommodates four adults, while the spacious indoor and outdoor seating areas provide excellent spaces for entertaining family and friends. Thanks to its shallow draft, the Merry Fisher 895 can also access many beautiful natural harbors and secluded anchorages throughout the archipelago.

This particular boat is being offered by its original owner and has been stored exclusively in a heated indoor facility during the winter months. It has been serviced regularly and remains in outstanding condition. The boat is exceptionally well equipped and has benefited from several upgrades and modifications designed to enhance onboard comfort and usability.

This boat is already afloat and ready for immediate use, perfectly prepared for the summer cruising season.
