

Coronet 21DC year 1970

The Coronet 21 DC is one of the most iconic Scandinavian classic powerboats ever built, renowned for its timeless Danish design, outstanding craftsmanship, and excellent seakeeping characteristics. Combining elegant lines with a deep-V hull and solid construction, the model remains highly sought after by enthusiasts who appreciate classic style without compromising usability.

This particular example has undergone a comprehensive professional restoration while carefully preserving the boat's original character. Winter stored indoors throughout its life and never left exposed to the elements during the off-season, she presents in exceptional condition. Since autumn 2023, the boat has remained in heated indoor storage and has not been launched following the completion of an extensive mechanical rebuild.
