

Neptunus 168 Flybridge, 1991

The Neptunus 168 is a high-quality Dutch motor cruiser. It was designed specifically for long-distance cruising and can handle even rough sea conditions with confidence. In addition, the Neptunus offers excellent living accommodations: the crew is sure to enjoy extended stays on board, and the three spacious cabins comfortably accommodate up to eight people.

The engines have been serviced regularly and have accumulated only 2,000 operating hours. This yacht, now being sold by its original owner, has been stored in a heated facility during the winter months and has been exceptionally well cared for throughout its life, with maintenance carried out by professionals.
