

Noblesse 38 XL, 2007

The Noblesse 38 XL is a high-quality Dutch steel motor yacht designed for relaxed cruising in coastal waters, archipelagos and inland waterways. Built in 2007 and imported from the Netherlands directly to Lake Saimaa in 2012, she has spent her life in sheltered freshwater conditions — first on an inland lake in Holland and since then exclusively on Saimaa.

As a Nordic version, she is fully insulated and fitted with selective double-glazed windows and a long keel, adding comfort, stability and confidence across the season. With four proper berths, a spacious saloon, excellent headroom and a teak deck in very good condition, she offers a refined and practical setting for extended stays on board.

Stored indoors during winters both in Holland and Finland, and professionally polished and maintained, this Noblesse 38 XL presents as a solid, elegant and ready-to-enjoy cruising yacht.

The interior was handcrafted by Kooistra Interieurbouw in Lollum, Friesland — a traditional Dutch ship carpentry workshop renowned for custom, high-quality interiors.

Walk-through videos of the yacht are available on request.

Measurement

Length 12,2 m

Beam 3,95 m

Draught 1,1 m

Dry weight approx. 13 000 Kg

Fuel 500 L, stainless steel tanks

Water 500 L, stainless steel tanks

Holding tank 250 L, stainless steel tank

Berths 4, (all beds have length of 2 meters).

Air draft approx. 2,8 m with collapsible radar arch
