Maxi 1050 (2005)
Designed by Pelle Petterson, the Maxi 1050 is a fast and secure cruiser-racer that combines good sailing performance with comfort and quality. She has modern yet classic lines, well-balanced sailing characteristics and a roomy interior with a classic, cosy feel. Pelle Petterson's long career as a yacht designer shows in a boat that is easy to love and that has been highly appreciated by her owners since launch.
The current owner has looked after the yacht very well. Below deck, the classic and very cosy interior makes optimal use of the hull's volume. The galley has a functional pantry with double sinks, an oven with hob and generous storage, while the saloon offers ample room for dinners and get-togethers. Aft of the galley is the entrance to a nice aft cabin, and to starboard is a well-sized heads and the navigation station. In the forepeak, a comfortable forward berth awaits. The cockpit is large enough for the whole crew, and the yacht is fitted with plenty of storage throughout.
Recent investments include new sails (2023), new house batteries (2026), a new diesel heater (2026), a new bow ladder (2024) and latest engine service in May 2026.

Location: Vaxholm, Sweden

Dimensions and Capacity:
Hull built in polyester and fiberglass laminate with a sandwich in the areas above the waterline and deck

- Hull length: 10.55 m
- Beam: 3.25 m
