Veneentekijäntie 6, 00210 Helsinki

Scanmar 345, 1989

The Scanmar 345 is a well-regarded Swedish cruising yacht designed by Rolf Magnusson and built by Börjesson Brothers during the late 1980s and early 1990s. Developed as an evolution of the popular Scanmar 33, it is known for combining Scandinavian build quality, practical sailing characteristics and a warm, comfortable interior.
The model has earned a strong reputation among sailors looking for a capable and reassuring yacht for coastal cruising, holiday sailing and longer passages.
This 1989 Scanmar 345 offers a good balance between performance and comfort. It is easy to handle with a small crew and provides a practical, comfortable layout for relaxed cruising.

Walk-through videos of the yacht are available on request.
